

## COVID-19 UPDATE

To all our Customers

We felt it was important to inform all of our customers how we, here at City Lifting Limited, are responding to the Coronavirus outbreak. We want to let you know and reassure you that we are doing everything we can to continue to deliver our services and operate from our depots and offices to the best of our ability during this difficult time.

All staff with existing health conditions that make them vulnerable are Furloughed or working from home depending on their role.

We have advised all our staff to strictly adhere to the guidance issued by the Government and Public Health England and please be assured that the safety and welfare of our staff, customers and suppliers is our highest priority.

Our focus is on implementing sensible personal hygiene measures such as hand washing, avoiding physical or close contact with other people and minimising travel by public transport. We are constantly working to keep our office environment and vehicles clean and safe for our staff. We are keeping the same teams together where necessary and they are travelling in their own company vehicles. Masks and gloves are available for our staff if they are required.

We are still carrying out site meetings where necessary and all staff have been advised on how to conduct themselves at these meeting to minimise any risks.

At present our work level has dropped significantly but we have had no business interruptions and we have been able to carry out all lifting operations we have been given and will strive to continue delivering our best service.

Anyone suspected of having the symptoms of the virus has been told to stay at home and self-isolate and we are checking the health of our staff regularly.

We are continually monitoring the situation and will update this statement if necessary.

Trevor Jepson  
Managing Director
