

CITY LIFTER CL25

MINI FLAT TOP TOWER CRANE

The City Lifter is a Mini Tower crane with many mounting possibilities due to its low weight and overturning moment. It can be used on the front of a project to lift materials directly from the road or delivery truck into a basement area or to loading platforms or a roof area.

It can also be mounted on a roof or attached to a rising slipform. This crane has 150 metres of hook path as standard. Ideal for refurbishment projects. It can replace hoists or beam hoists and lift materials from road level. It can be a very useful crane after the main tower crane is removed towards the end of a project.

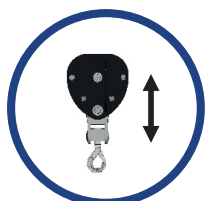

Made in Sweden by Artic Crane AB

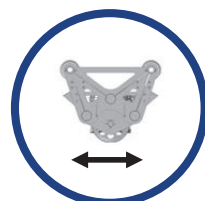

Jib Length (Meters)						
10	0 → 6m 2500 kg	7m 2500 kg	7.5m 2500 kg	8m 2300 kg	9m 2000 kg	10m 1850 kg
